Harry, thanks for the follow up. Yes, we were happy with the way the email and letter were structured. I think Dave and Jeryl could have completed this review on their own, but after the OU-3 risk assessment comments went out so quickly and as a bit of a surprise with respect to what they were requesting, we felt a bit more monitoring of this transition process should be completed. I think Dave did a great job developing these comments. Thanks for your involvement.

Jeff: I think that the caveats that Dave put into the email and the letter are consistent with our conversation yesterday and hopefully with your expectations as well. We tried to make it clear that the comments were for NDEP consideration only. That being said, I was encouraged that Jeryl seemed to concur with the majority of our comments. Let me know if there is more to discuss regarding these OUI comments in particular. Regards, Harry

Subject: EPA Comment Letter to NDEP re Anaconda OUI Draft RI w attach

Dear Jeryl,

The United States Environmental Protection Agency (EPA) has completed its review of the following document submitted by Atlantic Richfield Company (ARC): Remedial Investigation Report, Site-Wide Groundwater Operable Unit (OU-1), October 20, 2017.

EPA is submitting the attached comments for NDEP's consideration in determining next steps on OU1.

EPA initiated its review prior to deferral of the site to the State of Nevada, so our comments on this deliverable are fairly detailed.

EPA's review of future deliverables will be limited and will be handled in accordance with the Deferral Agreement.

Please contact me with any questions or concerns. Thank you.

Best Regards,

David A. Seter, P.E.
